-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 20 January 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.

DETAILED ACTION

Restriction to one of the following inventions is required under 35 U.S.C.

121:

- I. Claims 1-23 , drawn to a method for recovering acetone from a waste stream from an acetone purification stage, wherein said waste stream comprises mesityl oxide, classified in class 203, subclass 78.
- II. Claims 24-26, drawn to a method of manufacturing phenol and acetone from cumene according to the Hock process, classified in class 568, subclass 411.

The inventions are distinct, each from the other because:

Inventions II and I are related as combination and subcombination.

Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed. The combination could simply require the process of separation via extraction with or without additional distillation steps. This is recognized by applicants, noting page 1, last four lines from the bottom, of the specification. The subcombination has separate utility such as in a manufacturing process in lieu of a purification process.

Art Unit: 1764

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case, the different inventions have different modes of operation, different functions or different effects as the invention of Group II requires a reaction method or process for manufacturing purposes, unlike the invention of Group I requiring only a method or process of purification.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification; and have acquired a separate status in the art because of their recognized divergent subject matter above; and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Virginia Manoharan whose telephone number is 571-272-1450.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Glenn Caldarola, can be reached on 571-272-1444. The
